

Alert: Microsoft Patch Update

Recommendations

- Apply Microsoft security updates as soon as possible.
- Prioritize SharePoint server updates due to active exploitation of vulnerabilities.
- Ensure Microsoft Defender is updated to the specified version.
- Prioritize Microsoft Office updates, especially in environments handling emails and attachments.
- Review critical Windows systems and network-exposed services.
- Monitor for potential indicators of compromise (IoCs) on unpatched systems.
- Maintain an up-to-date inventory of assets and deployed versions.
