

### **Eduardo Aznar Gadea**

Graduated in Chemistry from the University of Valencia (Spain) in 2014. Master's degree in Experimental Techniques in Chemistry from the University of Valencia (Spain) in 2015.

PhD in Chemistry from the University of Valencia (Spain) in 2022.

He worked for two years as a laboratory technician in the Optoelectronic Materials and Devices Unit of the Institute of Material Science in Valencia (Spain). After that, he was working as a researcher at the Institute of Material Science. His research interests are focused on the development of new nanomaterials for plasmonic, and photonic applications, including the synthesis of metallic nanoparticles, polymeric nanocomposites and conducting polymers.

He is currently working as a laboratory technician in the Crystal Growth and Characterization Group (CreCYCSem) at Applied Physics Department of the University of Valencia.
