

CHOICE AND REALIZATION OF THE PRACTICES

The external internships are planned annually, giving the student the opportunity to integrate into a company related to the professional field of the master's degree.

The University of Valencia has an integrated model of management of internships in companies, managed by its University-Business Foundation, ADEIT, to meet the demands of the student and the needs of their degrees and companies.

The companies and entities are located in the geographical environment of the University of Valencia, mainly in Valencia capital and surroundings, and are also available in other towns of the province, the rest of the Spanish state and in countries of the European Union.

To plan the internship there are two tutors: the company and the academic. The functions of the company tutor are: assign tasks to students, monitor their execution and issue a report on the progress/completion of the practice. In the case of the academic tutor, its main functions are: to contact the company tutor, to supervise the tasks developed by the student and to evaluate their activity.

The internships are carried out in sectors and centers related to the degree. The selection policy of the same contemplates that they are representative of the plurality of fields covered by the degree, the geographical diversity of origin of the students and the quality of the program of activities programmed in each of them.

SECTORS OF COMPANIES WHERE THE INTERNSHIPS ARE CARRIED OUT

In general, any graduate will be able to work in fields related to:

- Environmental remote sensing,
- GIS applied to spatial planning and urban planning projects,
- GIS applied to environmental projects,
- Landscape and heritage analysis techniques,
- Diagnostic techniques and
- Mobility planning or geomarketing.

On the other hand, and according to the itinerary studied, they may choose companies specialized in:

• ITINERARY A: ENVIRONMENTAL MANAGEMENT. Graduates of this itinerary can do internships in companies and institutions that deal with issues related to:

- Geomorphological mapping,
- Risk mapping,
- Environmental mapping,
- Planning and management of areas of natural interest,
- Emergency plans and risk management,
- Environmental impact assessment and strategic environmental assessment,
- Inventory of land uses and natural resources,
- Applied climatology studies,
- Restoration of natural systems,
- Evaluation and design of sustainability strategies and
- Studies and audits in general.

ITINERARY B: TERRITORIAL MANAGEMENT. Students who have chosen this specialty will be able to carry out their internships in companies and institutions whose priority objectives are:

- Spatial planning plans,
- Urban planning and management,
- Land policy,
- Mobility policies, transport and logistics and
- The design of participation plans that are already mandatory in most territorial planning and management processes.

PROCEDURE FOR CHOOSING INTERNSHIPS

Each ADEIT course offers internships for the master's degree, with places of varied profiles and different schedules and periods of completion. The list is hung in the virtual classroom and students have a period of 15 days to send the internship coordinator a list of between 3 and 5 places, with an order of preference.

The coordinator assigns the requested places and in cases where there is a coincidence between several students, he talks to them to try to adjust their profile to the requested places.

REALIZATION OF THE PRACTICES

In an informative meeting the students receive information about the specificity of the module, administrative aspects, etc. In this presentation, the calendar of complementary activities that students can receive in the center is delivered.

The academic tutor establishes a calendar of periodic interviews with the students, where they must give an account of the evolution of the practice.

In the same way, the academic tutor is in constant relationship with the tutor of the company or institution to guarantee the correct development of the practice, and compliance with the training commitments and competences that the student must acquire.

For the evaluation, the provisions of the verification report and the teaching guide have been followed. The rating is based on:

1. The report of the practices carried out, drafted and presented by the student.
2. Report of the tutor of the company.
3. Monitoring of the practices by the academic tutor.
4. Carrying out, where appropriate, complementary activities (courses to improve employability, workshops on professional experiences, etc.).

The academic tutor of the student at the university will evaluate the work done, taking into account the monitoring of the practices, as well as the previous reports and reports.
