

## CHOICE AND PRACTICE

External practices are planned annually, giving the student the opportunity to integrate into a company related to the professional field of the master.

The University of Valencia has a model integrated management practices in companies, managed by the Foundation University-company, ADEIT, to meet the demands of the student and their qualifications and business needs.

Companies and organizations are located in the geographical environment of the University of Valencia, mainly in Valencia City and surroundings, and also feature in other towns in the province, rest of the Spanish State and in countries of the European Union.

To schedule practices there are two guardians: Enterprise and academic. The functions of guardian of company are: assign tasks to students, monitor their implementation and issue a report on the progress completion of the practice. In the case of the academic tutor, its main functions are: contact the tutor of company, overseeing the tasks carried out by the student and evaluate its activities.

Practices are carried out in sectors and centers related to the degree. The selection of the same policy contemplates that the title, the geographical diversity of the origin of the students and the quality of the program of activities scheduled in each of them are representative of the plurality of fields covering.

## SECTORS OF BUSINESSES WHERE THE PLACEMENT

In general, any graduate be able to work in related fields:

- Environmental remote sensing,
- GIS applied to spatial planning and urbanism, projects
- GIS applied to environmental projects,
- Analysis of the landscape and heritage,
- Diagnostic techniques and
- Planning of mobility or geomarketing.

On the other hand, and in accordance with the completed route, they may choose companies specializing in:

• **ITINERARY A: MANAGEMENT OF THE ENVIRONMENT.** Graduates of this itinerary can perform practices in companies and institutions dealing with issues relating to:

- Geomorphological mapping,
- Cartography of risks,

- Environmental mapping,
- Planning and management of areas of natural interest,

- Studies and audits in general.

ITINERARY B: TERRITORIAL MANAGEMENT. Graduates that have chosen this speciality may make their practices in companies and institutions whose main objectives are:

- Land management plans,
- Planning and urban management,
- Soil policy,
- Mobility policies transport and logistics and
- The design of participation schemes that are already required in the majority of the processes of planning and territorial management.

#### PROCEDURE FOR ELECTION OF THE PRACTICES

Each course ADEIT bidding practices for the master, with squares of various profiles and different schedules and periods of preparation. The list hangs in the virtual classroom and students have a period of 15 days to send to the Coordinator of practices a list of between 3 and 5 squares, with an order of preference.

The Coordinator assigns the seats chosen and in cases in which there is agreement among several students, talk to them to try to adjust your profile to the chosen places.

#### IN THE PRACTICAL EXERCISES

In a briefing, the graduates receive information about the specificity of the administrative aspects, etc. In this presentation is delivered the calendar of activities that the graduates can be in the Centre.

The academic tutor sets a timetable of regular interviews with the graduates, where these should give an account of the evolution of the practice.

In the same way, the academic tutor is in constant relationship with the tutor of the company or institution to ensure the correct development of the practice, and compliance with training commitments and competencies that must be purchased by the graduates.

For the evaluation has been followed in memory of verification and teaching guide. The rating is based on:

1. the memory of practices performed, written and presented by her student.
2. report of the guardian of the company.
3. Seguimiento of the practices by the tutor it academic.

The academic tutor of the student at the University will evaluate the work performed, taking into account monitoring practices, as well as memoirs and reports mentioned above.

The subject may have complementary activities, such as courses to improve the employability (taught by the OPAL). EST
