

EXCHANGE STUDENTS

The Health, Safety and Environment Service carries out prevention, health assistance and promotion of health for all members of the university community (teaching staff, administrative staff and students). This is done through the Labour Health Offices on the three campuses.

Service of attention to students in the Health Offices:

- **Assistance in case of common illness**, during office hours. There are some countries with an agreement with the Social Security, whose citizens are given medical attendance. To find out which is your health centre - depending on your address in Valencia- you can dial phone number **012** (from 8 am to 7 pm, from Monday to Friday, or dial phone number **112** at other hours/days). At the health centre, they will appoint a family doctor to you. There will be no problem in arranging examinations, making blood tests or special proofs. It would be helpful if you took with you the European Health Card when you go to a health office.
- **Emergency Assistance and First Aid**
- **Assistance in case of school accident**
- **Health promotion** (specific campaigns)
- **Health education and information**

SCHEDULE of the UV Health Offices except for emergencies:
